Flushing 5/5/93

Dr Torrey
Resp'd Friend

We are in rect
of your favor of the 2nd inst
We received the first parcel
of seeds & gave them into
the hands of our propagator
for careful attention. —
We are much obliged
for your efforts to obtain
them for us & hope we
may get from them
something that will
interest you. —
We had about a quart

of the seed of the
Torreya California
sent us by our agent
in California. They were
planted at once, some
of them have vegetated
& now of them are in
a condition to be of
much service to you.
We shall probably
have more sent us
next fall and will
reserve you some. —
It comes up from the
soil like an asparagus
& is as you observe closely
allied to the Taxus
& Podocarpus.

HARVEY CORRESPONDENCE
HERBARIUM
COLUMBIA UNIVERSITY.

Dear Sir

I was so much
surprised yesterday that
I could do no more
than leave for your
perusal the little
letter which seems
to render it inexpedient
to visit the Normal
School before next
week. I hope that
your presence in Princeton
this week is not so
inoperative as to deprive

us of the pleasure of
your Company next
week — Think if
we can make a party
we shall have a
good time, but our
new pleasure should
not be allowed to
interfere with your
engagements or duties

Yours very truly

C. B. Parker
